Social Network

-  LinkedIn Profile
-  GitHub Profile

Languages

-  English
-  Spanish

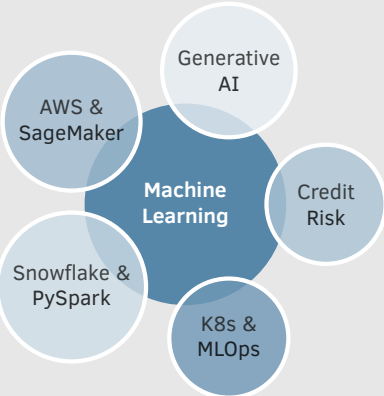

Hard Skills

-  Python, PySpark, SQL
-  AWS, GCP, Azure
-  Machine Learning, GenAI
-  Kubernetes, Docker, CI/CD

Soft Skills

-  Business Problem Solving
-  Mentorship & Leadership
-  Analytical Thinking

Core Focus

Professional Experience

- 08/2025 – 08/2026

Data Scientist

Banco Mercantil

 - Developed and deployed predictive machine learning models for credit risk assessment (PD / IFRS9) utilizing the AWS SageMaker ecosystem and Amazon S3 storage.
 - Engineered and optimized large-scale data pipelines using PySpark, performing data ingestion, feature engineering, and financial data modeling integrated with Snowflake.
 - Orchestrated, monitored, and managed microservices and predictive model containers using Kubernetes, ensuring high availability in the credit concession pipeline.
- 05/2024 – 03/2026

Data Scientist Mid-level

Avenue Code

 - Architected and deployed GenAI solutions, notably a WhatsApp conversational AI assistant using Gemini and Dialogflow, integrated with BigQuery and Cloud Run.
 - Built end-to-end scalable ML pipelines using Python components in Vertex AI, PySpark on Databricks, and Apache Airflow.
 - Trained advanced classification and regression models (CatBoost) and performed time series forecasting using BigQuery AutoML and ARIMA_PLUS.
 - Managed automated deployments via GitLab CI/CD and mentored new engineers.
- 09/2023 – 05/2024

AI Architect

YH Brasil

 - Led the development of NLP and Speech-to-Text (STT) solutions, processing media ingestion for insight extraction across diverse noise conditions.
 - Designed highly available data pipelines on GCP utilizing Dataproc for distributed processing and Cloud Composer for orchestration.
 - Implemented CI/CD workflows using GitHub Actions to automate Cloud Run service deployments.

Data Specialist & AI

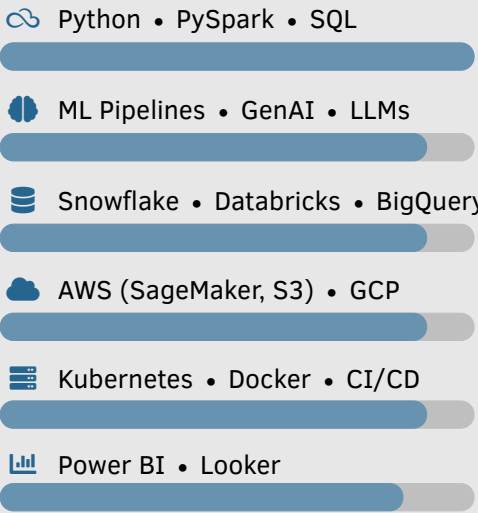

About Me

I am a Machine Learning Engineer and Data Specialist with over 9 years of experience focused on translating complex data into scalable, production-ready solutions. I bridge the gap between advanced statistical modeling and robust multi-cloud architectures (AWS and GCP).

My expertise spans from predictive modeling in the financial sector (Credit Risk, PD, IFRS9) structured upon the AWS ecosystem (SageMaker, S3) and Snowflake, to designing modern Generative AI and MLOps systems.

With a strong foundation in distributed processing (PySpark) and microservices orchestration using Kubernetes, I architect end-to-end pipelines that ensure high performance, security, and real business impact.

Tech Stack Proficiency

Professional Experience (Continued)

04/2023 – 09/2023	AI & Systems Architect • Architected a Lakehouse-based software environment and developed REST APIs using Django, FastAPI, and Flask. • Developed deep learning models using TensorFlow for voice command recognition, audio spectrogram analysis, and background noise removal.	MedRoom
08/2022 – 02/2023	DevOps Engineer • Orchestrated cloud infrastructure and deployment pipelines utilizing Azure DevOps, Kubernetes, Terraform, and Docker. • Managed GitFlow processes and developed microservices with Python and Bash Scripts on RHEL environments.	CI&T
08/2019 – 08/2022	Machine Learning Engineer • Created PySpark text-processing jobs and developed ML models for multiple client pipelines on a Lakehouse architecture. • Designed a highly available STT infrastructure on GCP using Dataproc, Cloud Functions, and Firebase. • Applied advanced NLP and statistical analysis to generate strategic business insights.	Myra Consulting / Mutant
06/2014 – 08/2019	BI Coordinator & Sr. Analyst • Progressed from Senior Analyst to Coordinator, designing MS-SQL Server Data Warehouses (Star Schema) and ETL processes (SSIS). • Administered databases on Azure Windows Server, optimizing queries and monitoring hardware performance via Zabbix. • Built dynamic ASP.NET interfaces and interactive dashboards in Power BI and Qlik Sense for real-time KPI tracking.	Atento & Myra Consulting

2009 – 2012	BSc in Information Systems • Comprehensive study in software engineering, Object-Oriented Analysis, and standard SQL databases (Oracle). • Developed custom distributed and web applications applying Scrum, UML, and Design Thinking methodologies.	UNIBAN - São Paulo
2018	English Exchange Program • Immersive language program focusing on advanced reading, writing, speaking, and listening skills in professional and daily contexts.	Delfin School - Dublin

Certifications & Advanced Learning

2021	Statistics for ML with Python • Applied statistics, probability distributions, and hypothesis testing (ANOVA, Chi-Square, Wilcoxon) implemented in Python.	Udemy Academy
2021	Neural Networks & Deep Learning • Mastered theoretical and practical concepts of Deep Learning, including perceptrons, backpropagation, CNNs, RNNs, and GANs using TensorFlow and Keras.	Udemy Academy
2020	GCP Data Engineer & ML • Professional Certificate focusing on designing, building, and operationalizing data processing systems on Google Cloud Platform.	Coursera
2018	SQL 2016 - Business Intelligence • Advanced ETL design, database backups, and procedure automation using SSIS, SSAS, and SSRS.	Impacta Tecnologia
